The amendment received 4/26/06 has been made of record. Claims 1-28 are pending.

The objections and rejections contained in the previous office action are withdrawn in view of applicants' amendments and arguments.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aquazole in view of WO '028.

Aquazole teaches water in fuel emulsions suitable for powering vehicles. This reference fails to explicitly recite the use of Fischer-Tropsch derived fuel or cetane values.

It is the position of the examiner that the WO '028 reference renders obvious the use of a Fischer-Tropsch derived fuel in the compositions of the primary reference. This combination is seen as inherently resulting in applicants' claimed ignition delay and cetane values.
